

## Easy Therm Quattro Control Unit

# Easy to install – and easy to use

With the Easy Therm Quattro it's easy to make life on board comfortable for both driver and passengers. Setting the climate in buses has never been simpler.

MCC Easy Therm Quattro, "ETQ", is a control unit housing buttons, user-friendly knobs and control electronics – everything you need for setting and controlling the climate for both the driver and the passengers and for keeping windscreens clear. You can even choose customized knob functions to suit your own specific requirements.

The Easy Therm Quattro lives up to its name. The user-friendly front panel has been specially designed to make it really easy for the driver to set the desired climate.

This unit has car-audio dimensions for mounting in a standard frame.

You can connect the Easy Therm Quattro to a Viper MK1 Control Box or a Viper 2000 node 1 for total control over the passenger climate system TSV/AC.
