

P200 Convector

Turn on the heat with our most powerful convector

The MCC P200 Convector is not only the most powerful convector in our range offering highly efficient bus heating, but now comes in a new attractive and streamlined design, fully integrated with the Whisper 200 heating fan.

The P200 is based on a twin copper pipe system that supplies hot water to the fins, starting convection around the convector.

The P200 is designed for optimised heating capacity, up to 714 W/m. The P200 convector is also part of the system 200. The heating fans, Whisper 200, PC500 and the P200 convector have the same cover profiles and are easily integrated.

This means easy installation. MCC's P200 is supplied with aluminium cover sections and front panels and end covers in grey plastic.

Features

- Suitable for heating in buses, coaches and anywhere high efficiency heating is required
- Designed for vehicles with waterborne heating systems
- Very high output
- Noiseless and draught-free heating
- Maintenance-free
- Modern design
- Compatible with Whisper 200 fan and Power Convector, PC500

P200 Convector

MCC Convector

Technical Data

Output	Heat output 714 W/m @ Q60 (1190 W/m @ Q100)
Piping	Copper \varnothing 22 mm
Weight	3.4 kg/m
Liquid capacity	0.68 l/m
Depth	101.8 mm
Height	162.6 mm
Maximum length	6000 mm
Cover sections	Anodised aluminium
Installation method	Plastic clips which slide along convector
Accessories	Selection of end fittings

*) the Q value stands for the temperature difference between the water inlet temp and the air temp in the room where the heat exchanger is placed. For instance Q60 can stand for water inlet temp +80°C and air temp +20°C.
