

# Installation Information

## Heating fan Whisper 3C

PRD0337E01en

### Installation instructions

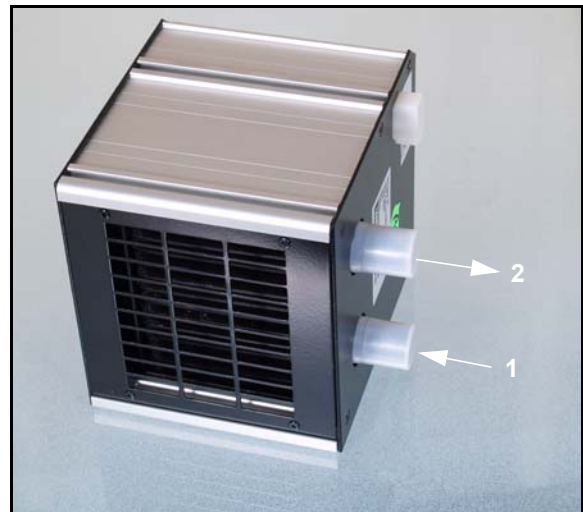

- This instruction refers to the UWE product Whisper 3C
- On receipt of the goods, remove all packaging material and check all items for transport damage.
- Check that the delivered goods correspond to the specifications of the delivery note.

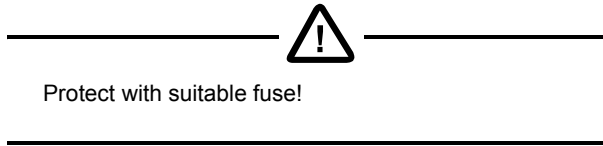

The correct function and performance of the product are only guaranteed on condition that the instructions given in this document are strictly followed.

### Mounting of the fan module:

1. Use the T-slots on the housing to facilitate mounting
2. Connect the heating fan to the vehicle heating system via a hose (diameter 22mm) as follows:  
(1) supply flow  
(2) return flow
3. The air nipple shall be directed upwards

4. Connect 24V DC to the heating fan AMP contact (see figure)  
(1) +  
(2) -
