

# Mobile Climate Control consolidates its production in Europe

MCC has decided to close its production plant in Norrtälje outside Stockholm, Sweden and transfer all production to its facility in Olawa outside Wroclaw, Poland. The transfer will begin in October and be finalized by the end of the year. The Norrtälje plant currently has 50 employees and yearly sales of approximately 120 MSEK. Its European Sales and Engineering Center with around 10 employees will remain in the Stockholm region. Negotiations with the unions will begin immediately.

“MCC has overcapacity in Europe and our relatively new plant in Poland provides excellent conditions for production and we are constantly reviewing our competitiveness to make sure we can defend our position as one of the leading global suppliers of HVAC-systems to the commercial vehicle industry” says Clas Gunneberg, President & CEO for Mobile Climate Control Group.

Stockholm 2011-09-01

Mobile Climate Control (MCC) is one of the leading global suppliers of climate control systems to the commercial vehicle industry, with operations in USA, Canada, Sweden, Poland, Germany and China. MCC has annual sales of 190 M\$ and almost 600 employees.
