

Description

The **UWE non-return valve** is a clack non-return valve and is used in waterborne heating systems to prevent counter flow. The non-return valve is available in the following dimensions: 3/4, 1, 1 1/4 and 1 1/2".

For fully effective operation it is very important that the non-return valve is attached upright and horizontally, and that the arrow on the valve matches the direction of flow.

Technical data

Dimensions & weight

| D | L (mm) | H (mm) | Weight (g) |
|--------|--------|--------|------------|
| 3/4" | 53 | 51 | 200 |
| 1" | 63 | 61 | 345 |
| 1 1/4" | 70 | 73 | 425 |
| 1 1/2" | 88 | 93 | 760 |

General

Max temp (+110C)
Max pressure (20bar)

Material

Valve house (Brass)
Flap (Brass)
