# Mobile Climate Control Breaks Ground on New Brampton Facility

Brampton, ON — Mobile Climate Control (MCC), a leading brand within VBG Group (Publ.), officially broke ground on a new state-of-the-art facility in Brampton. The event was attended by Mayor Patrick Brown, Councilor Harkirat Singh Toor, and senior representatives from MCC, Panattoni Development Company, Nexrock Design Build Inc., and Turner & Townsend.

The new 260,000-square-foot facility represents a strategic expansion of MCC's Canadian operations and a long-term investment in the Brampton community. Once operational, the site will support advanced manufacturing, engineering, and logistics functions, and is expected to create over 550 jobs in Brampton.

*"This groundbreaking marks a major step forward for MCC and the broader MTS division," said Jimmy Karttunen, Senior Vice President & Chief Strategy Officer of Mobile Thermal Solutions. "Brampton offers the infrastructure, talent, and community partnerships we need to grow. We're proud to build here and contribute to the city's economic future."*

The facility will serve as MCC's Canadian headquarters and innovation hub, supporting the development of next-generation climate control systems for commercial vehicles and industrial applications. MCC's investment will also strengthen Brampton's tax base and foster collaboration with local suppliers, schools, and workforce development programs.

*"We're thrilled to welcome MCC to Brampton," said Mayor Patrick Brown. "Their commitment to innovation and job creation aligns perfectly with our vision for a thriving, future-ready city."*

### Key Highlights:

- 260,000 sq. ft. facility designed for advanced manufacturing and R&D
- \$120+ million investment
- 550+ jobs across engineering, production, and operations
- Strategic partnership with Panattoni and the City of Brampton
- Sustainable design and long-term community investment

The groundbreaking ceremony reflects MCC's commitment to building strong public-private partnerships and driving sustainable industrial growth in Ontario.

# Mobile Thermal Solutions

## About MCC

Mobile Climate Control is a leading brand within the Mobile Thermal Solutions division, specializing in high-performance climate control systems for commercial vehicles, off-road machinery, and specialty applications. MCC is known for its engineering excellence, customer focus, and commitment to sustainability.

## About MTS

Mobile Thermal Solutions (MTS), one of three divisions of VBG Group (Publ.), is a global provider of advanced thermal management technologies, serving customers across North America, Europe, and other international markets. MTS combines innovation, reliability, and deep industry expertise to deliver solutions that keep people and machines operating at peak performance—worldwide. Bus Climate Control is the second leading brand within the division. All transit authorities in the GTA area are having AC and defroster products provided by us.
